

PERIMETER GUIDE PINS AND PAD EYES

Perimeter Guide Pins

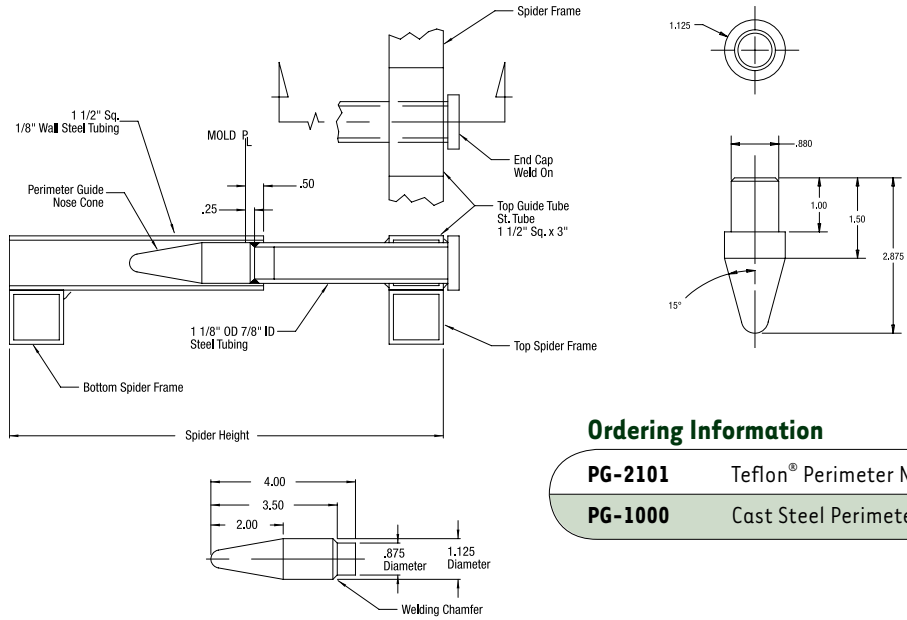

With the Lakeland Mold perimeter guide system you can quickly and easily guide spider halves together without damaging parting lines. Our nose cones allow you to quickly create a custom guide system for any frame. Nose cones are available in two styles, cast steel and Teflon®. The Teflon® nose cones prevent scratches and damage to parting lines and cavity surfaces.

- PG-1000** Cast Steel Perimeter Nose Cone

Pad Eyes

Pad eyes are used in conjunction with alignment guides for aligning a mold piece with ease. These can also be used as pick up hooks if welded onto the mold framework.
